

Template COVID-19 test results register for students

Why is this register important?

This template is for your school to track Lateral Flow Device (LFD) test results offline. It is important to know when a student has tested positive, or gets a void result.

How to use this register

You can customise this template to suit the needs of your school. However, you should register the minimum: name, test result and (if needed) a Unique Test Subject identifier, such as date of birth below in Section A.

If you wish to record the steps your school has taken following a positive or void test result, you

Important: how to ensure data and safety compliance when using this register

This register will contain sensitive information about students, so it is important that you follow the procedures when managing this register in your school. You should securely store it until further notice and ensure that you are compliant with Data Protection Law.

A) Essential information which must be recorded			
Name of test subject (the person undertaking the test)	Date of birth (or equivalent unique test subject identifier)	Test result (positive/negative/void)	Date of test
